When you use this information under the Open Government Licence, you should include the following attribution: CyBOK © Crown Copyright, The National Cyber Security Centre 2018, licensed under the Open Government Licence: <a href="http://www.nationalarchives.gov.uk/doc/open-government-licence/">http://www.nationalarchives.gov.uk/doc/open-government-licence/</a>.

The CyBOK project would like to understand how the CyBOK is being used and its uptake. The project would like organisations using, or intending to use, CyBOK for the purposes of education, training, course development, professional development etc. to contact it at **contact@cybok.org** to let the project know how they are using CyBOK.

#### INTRODUCTION

This index provides a guide to where various topics are discussed within CyBOK. Reference terms are presented alphabetically, with the knowledge areas most likely to contain the term shown in red. If a term is likely to be found in multiple knowledge areas, then all are listed.

Note that this document is just a guide. It was produced by analysing the terms used in other professional bodies of knowledge. We do not claim that it is complete, nor do we guarantee that the knowledge areas we refer to discuss the terms in detail—just that if they are discussed in CyBOK this is where you'll most likely find them.

For the sake of brevity we refer to the knowledge areas through acronyms. The acronyms are expanded below:

Acronym	Knowledge Area
AAA	Authentication, Authorisation & Accountability
AB	Adversarial Behaviours
С	Cryptography
CI	CyBOK Introduction
CPS	Cyber-Physical Systems Security
DSS	Distributed Systems Security
F	Forensics
FMS	Formal Methods for Security
HF	Human Factors
HS	Hardware Security
LR	Law & Regulation
MAT	Malware & Attack Technology
NS	Network Security
OSV	Operating Systems & Virtualisation
PLT	Physical Layer & Telecommunications Security
POR	Privacy & Online Rights
RMG	Risk Management & Governance
SOIM	Security Operations & Incident Management
SS	Software Security
SSL	Secure Software Lifecycle
WAM	Web & Mobile Security

#### **CHANGELOG**

**2020-03-06.** Initial version of the mapping reference 1.1.

**2020-10-08.** Mapping reference 1.2beta1 including the addition of 115 new terms taken from *introduction* and *formal methods for security* knowledge trees.

**2020-12-17.** Mapping reference 1.2 including corrections to introduction text and a changelog.
