

# Heist

An adversarial cyber security game  
Print and Play Instructions

Created by:  
Jake Montanarini  
Oli Buckley  
Helen Quinlan

## General Instructions

This document includes enough duplicates for a 5-player game.

If you are playing as an **Attacker** pages 4-7 are a starting set of cards (including starting deck, reference cards to guide with play order, and system upgrade locks). This document includes duplications of this set to enable up to 4-Attacking players to play. Use the following guide to ensure you have the right cards depending on the number of Attacking players:

Number of Attackers	Pages to Print
1	4-7 & 20-66
2	4-11 & 20-66
3	4-15 & 20-66
4	All

Printing can be reduced by not printing the card backs, however, if doing this familiarise yourself with the card for Attackers and those for **Defenders**. Additionally, clearly mark your **System Log Deck**.

### Cutting cards

All cards will have an outer pink line and an inner grey. It is encouraged that you cut to the inner grey line, but whichever line you choose it is important to maintain consistency. Having cards with roughly the same dimensions is an important aspect of the game!

### Player Boards

The player boards are not included in the Print and Play set to reduce printing. Ensure all players have space to lay five cards in front of them, along with space for their deck and space for a discard pile. Each player should place their System **Upgrade Lock** cards in two their slots when starting the game. See below for an example:

If you are the Defender, you will also need to keep a track of your **System Log Search Capacity**, you start at 1.

## Hotel Board

The Hotel board is not included in the Print and Play set, again to reduce printing. Ensure there is a space in the middle of the playing area to enable easy access for all. This space needs to be big enough for up to ten cards (five columns by two rows). Only cards tagged as hotel cards can be played here.

Ensure that the reputation card is nearby, with a cube on the starting reputation (see main rule book).

See below for an example of the Hotel space required:

## Rule Book

If there are any further questions, please consult the rule book for an extensive detailing of how to set up the game, how to play, and some of the game terminology.

We hope you enjoy the game and please do get in contact if you have any questions or feedback. You can find contact information on our website <https://www.thelaunchpadgames.com/>.

## 1\\Planning

all players

On your turn, take up to two actions:

- Play a card from hand.
- Play a card to your server.
- Buy card(s) from the market.
- Perform an action from your server or hotel board.

Play continues around the table until all players pass

All players draw back up to hand size

## 2\\Execution

attacking players only

Attackers reveal parts of their strategy to infiltrate the hotel

- Reveal any face down cards you choose, pay the cost.
- Perform any attacks, paying the costs.

Once all attacking players have declared their intent to attack or not play moves to the next phase

## 3\\Incident Report

defending player only

Perform the following clean up actions to prevent impact of any incoming breach:

- Reveal face down cards.
- Roll breach dice. Resolve result.
- Search system log for evidence.
- Pay staff salary.
- Gain income.
- Check end game conditions. If end has not been reached play moves back to 1\\Planning.

## \\.Search the Log

defending player only

The defending player draws cards from the top of the Log deck equal to the system log search capacity number on their player board.

If a log card is drawn, nothing happens.

If an attack card is drawn, the attackers lose a life. Keep the drawn attack card to one side.

Shuffle and return the deck.

## \\.Ending the Game

The game ends in one of two ways:

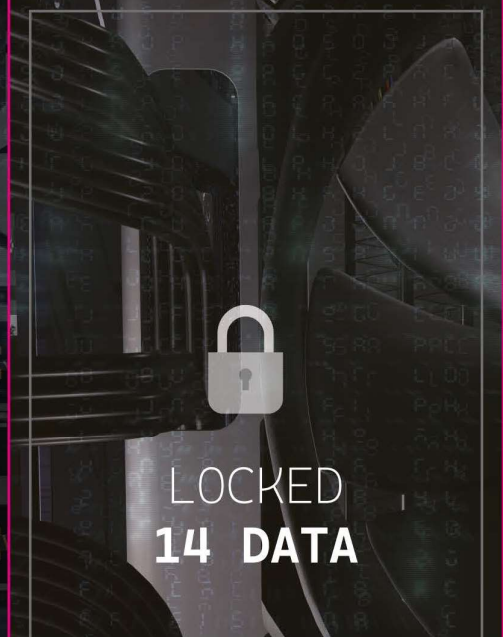

The attackers win if they reduce the defender's reputation down to 0.

The defender wins if they find 5 pieces of evidence from the System Log.

When either of these conditions are met, the game ends immediately.

SPECIALIST

### Experienced Pentester

0/3

Reward

---

Pay 2 fewer for your Hotel cards this turn.

KA: SOIM

SPECIALIST

### Aggressive Attacker

0/3

Reward

---

Increase the value of all breaches this turn by 1.

### Data Collector

0/2

Reward

---

Decrease the value of any number of breaches this turn by 1. For each breach you decrease, draw 1 card. If you decrease any breaches from another player, they also draw 1 card (max 1).

SPECIALIST

### Inside Person

0/1

Reward

---

Draw up to 3 cards from the System Log. If evidence is found, remove up to 1 evidence from the System Log. If no evidence is found, trash this card.

KA: AB

SPECIALIST

### Savvy Negotiator

0/1

Reward

---

-1 Time  
 Buy any card from the market for 4 less.

SPECIALIST

### Generous Benefactor

0/3

Reward

---

1 Time  
 1 Data  
 1 Credits  
 Give any of your resources to any other player. For each resource you donate, draw a card.

SPECIALIST

### Certified

0/3

Reward

---

-1 Time  
 Draw a card.  
 You can repeat this action up to 4 times.

SPECIALIST

### Tactician

0/3

Reward

---

For this turn you can add 1 dice to any 2 breaches. For each, the Defending player must roll all dice and take the lowest score.

SERVER/MALWARE

**DDoS**

Cost  
3 Time  
1 Data  
1 Credit

Reward

3 Breach = -1 Reputation  
Defender loses a card from their hand

Flood their network with as much traffic as you can and bring everything grinding to a halt!

KA: NS

SERVER/MALWARE

**Botnet**

Cost  
1 Time  
3 Data

Reward

-2 Data for one other attacking player of your choice  
4 Breach = -2 Reputation

Hit them with everything you've got by turning your army of infected hardware against the hotel.

KA: MAT

SERVER/MALWARE

**Ransomware**

Cost  
5 Time

Reward

4 Breach = -2 Rep  
Defender can't draw cards until a cost equal to the breach value is paid in Credits

What's better than stealing their data? Locking them out of their own files and then charging them money to get them back!

KA: MAT / AB

SERVER/MALWARE

**Spyware: Financial**

Cost  
1 Time  
1 Data

Reward

5 Breach = 3 Data & -1 Reputation  
Defender loses a card from their hand

This software is specially designed to get you all of the credit cards, cryptocurrencies and bank accounts you could ever need.

KA: MAT

SERVER/MALWARE

**Worms**

Cost  
5 Time  
1 Credit

Reward

3 Breach = -1 Rep  
After a successful breach this card remains in the attacking player's server and does not go into the System Log

Why just infect them once, when you can use a worm that will keep spreading and growing all on its own?

KA: MAT

SERVER/MALWARE

**APTs**

Cost  
5 Time  
5 Data  
3 Credits

Reward

6 Breach = -2 Rep  
After a successful breach this card remains in the attacking player's server and does not go into the System Log

This is going to require a bit more work, but you can take things to the next level with an APT and really hit hard.

Reward

---

Receive rewards from current employed Staff.

**1\\Planning**  
all players

On your turn, take up to two actions:

- Play a card from hand.
- Play a card to your server.
- Buy card(s) from the market.
- Perform an action from your server or hotel board.

Play continues around the table until all players pass

All players draw back up to hand size

**2\\Execution**  
attacking players only

Attackers reveal parts of their strategy to infiltrate the hotel

- Reveal any face down cards you choose, pay the cost.
- Perform any attacks, paying the costs.

Once all attacking players have declared their intent to attack or not play moves to the next phase

**3\\Incident Report**  
defending player only

Perform the following clean up actions to prevent impact of any incoming breach:

- Reveal face down cards.
- Roll breach dice. Resolve result.
- Search system log for evidence.
- Pay staff salary.
- Gain income.
- Check end game conditions. If end has not been reached play moves back to 1\\Planning.

**\\.Search the Log**  
defending player only

The defending player draws cards from the top of the Log deck equal to the system log search capacity number on their player board.

If a log card is drawn, nothing happens.

If an attack card is drawn, the attackers lose a life. Keep the drawn attack card to one side.

Shuffle and return the deck.

**\\.Ending the Game**

The game ends in one of two ways:

The attackers win if they reduce the defender's reputation down to 0.

The defender wins if they find 5 pieces of evidence from the System Log.

When either of these conditions are met, the game ends immediately.
