

CyBOK

Project: Case Studies in Support of Cyber Security Body of Knowledge

Nancy R. Mead, SEI Fellow,
CMU (ret)
nrmcmu@gmail.com

bristol.ac.uk

Case Study Project Description

- This project is to research and collect educational case studies in CyBOK areas, structure them into a standard format, identify the original sources, and ensure there are clear usage (copyright) permissions for educational purposes. Each case study will be cross-referenced to CyBOK area(s).
- Case studies have been identified in the areas of security requirements identification, threat modeling, malware analysis to identify overlooked security requirements, supply chain risk management, and risk analysis.
- Anyone can contribute a case study that meets these requirements.

Schedule

What	Who	When
Finalize format	Nancy	Complete
Identify case studies (title, author, CyBOK topic)	All	1 st cut complete, more needed
Deliver draft case studies to Nancy	All	3/1
CyBOK in Practice event	Nancy	3/2
Deliver remaining draft case studies to Nancy	All	3/5
Edit/assemble case studies	Nancy and Anne	3/16
Obtain any needed permissions	All	3/16
Complete internal review	All	3/23
Finalize	All	3/29
Deliver a day early	Nancy	3/30

Team Members

- Volunteer Advisory Board: Anne Kohnke, Dan Shoemaker, Bastian Tenbergen, Carol Woody
- All volunteer authors will be recognized in the document
- Volunteer authors must deliver case studies with clear copyright permissions in the case study format, which will be provided to any volunteers.
